Higher Secondary Education  
(2020-22)

## PROJECTS

### E-commerce Web App

- Developed a comprehensive e-commerce web application independently.
- Created an aesthetically pleasing and contemporary design to enhance user engagement.
- Enhanced user experience with guest user functionality.
- Designed and implemented a customized Admin panel for seamless application management.
- Integrated Stripe API for secure payment processing within the e-commerce application.

### Blog Web App

- Developed a MERN stack blog application enabling users to perform CRUD operations on blog posts.
- Utilized MongoDB as the database, Express.js for the backend, React.js for the frontend, and Node.js as the runtime environment.
- Implemented user-friendly features, allowing users to easily create, read, update, and delete blog posts.
- Streamlined the publishing process, providing users with a seamless experience for writing and publishing their blog posts.
- Leveraged the power of the MERN stack to create a robust and dynamic blog application, enabling users to share their thoughts and ideas effortlessly.

### Resort booking web App

- Developed a resort booking website , with a primary focus on reservation functionality.
- Designed and implemented a user-friendly interface for guests to browse available resort accommodations, view details, and make reservations.
- Implemented a comprehensive reservation management system to handle booking requests, availability
- Ensured a modern and minimalistic design that enhances the user experience and aligns with the resort's branding.

### MINI PROJECTS

- Image editor ( JAVA SCRIPT )
- E-commerce front-end
- Svg drawing tool(JAVA SCRIPT)
